NEW criteria of Forklift

Hyundai introduces a new line of 7A series
LPG forklift trucks.
Excellent power and performance make your
business more profitable.

OPSS (Operator Presence Sensing System)

Control of mast tilting, lifting and lowering is not possible through operation of the appropriate control when the operator is not in the seated position

The new master on the job-site!

Smooth running, efficient and ergonomically designed, 25LC/30LC-7A, 25GC/30GC-7A series are made to meet your needs.

59hp/ 2,300rpm

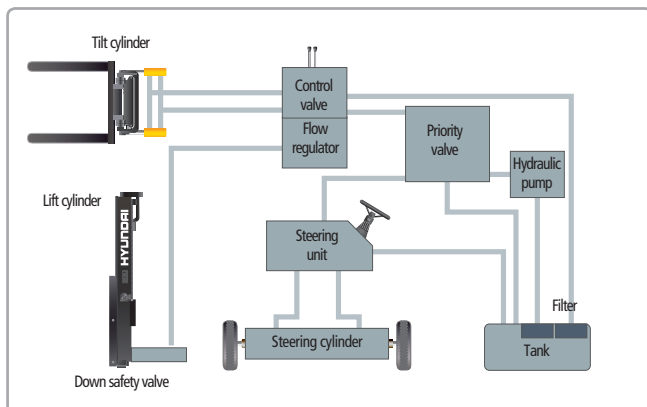

Powerful Engine HMC L4KB(2.4L) Engine

Market approved quality of HMC L4KB engine ensures incomparable performance, durability and additional value to the machine. Powerful and efficient engine provides excellent fuel economy and excellent torque for improved operation. (EPA/CARB Tier-IV Certified)

Fast and Stable Performance

Being able to quickly raise and lower the mast, as well as tilt it forward and backward, provides the best operational conditions during unloading. When the truck is fully loaded, mast lowering speed is carefully controlled to ensure safety by the down control valve. Mast, Lift and Tilt Lock System is standard.

State-of-the-art Hydraulic System

The latest large-capacity hydraulic system reacts quickly during operation, and a low-noise control valve increases both efficiency and durability.

Fully Hydrostatic Power Steering

A hydraulic steering system always guarantees smooth and flexible steering, preventing overrun and kick-back.

**High Power
Low Noise**

An attractive and adjustable seat, based on a human engineering design, provides great comfort, safety and durability.

New High Visibility for Safe Operation

The operator is able to work with increased safety and accuracy due to a wider view mast.

Ergonomically Positioned Pedals

Based on human engineering, the accelerator, brake and inching pedals are optimally positioned for convenience while operating the equipment.

Cup Holder & Console Box

Additional storage spaces are located inside the operating space for operator's convenience.

Quick Response of Operating Control Levers

Only minimal operator's effort is required for precise, safe and productive control.

Adjustable Steering Wheel

Steering wheel with horn button can be adjusted by a lever on the right-hand side for the most comfortable operator position.

Easy and Safe Shift Lever

A single lever on the left side of the steering column gives the operator fast, easy control of direction. The lever must be in the neutral position before the engine can be started.

Secondary Horn

Secondary Horn gives access to lights and horn

Danger-free through high durability!

Safety and durability are priorities in design of the equipment.

Strong Overhead Guard

The safety overhead guard meets ISO 6055 regulation and protects the operator during hazardous jobs.

Parking brake

Ratchet type parking brake requires less effort from the operator to set.

Highly Durable Split Type Drive Axle

The bevel gear set and hub reduction axle smoothly delivers desired torque to the drive wheels.

Large Footboard & Hand Grip

Wide "open" step offers convenience and safety when entering and exiting truck.

Expansion Bellows

The expansion bellows absorbs vibration and reduces noise generated from the exhaust system and also extends the life cycle of exhaust system.

Electrically Monitored Air Filter

Air cleaner sensor alerts the operator of a restricted air filter and allows replacement before damage occurs.

Heavy Duty Single Unit Frame

Heavy duty single unit type frame, designed on the basis of accurate structural analysis, guarantees durability and safety.

Bright, Protected Headlights

Bright, Protected head lights are positioned for exceptional visibility.

Ground Clearance

The engine and transmission are assembled horizontally and positioned high in the frame to protect major components during operation on rugged surface.
