### SINCE 1920

V. MARIOTTI S.r.l., founded in 1920, has more than 30 years specializing in the design and manufacture of small front-loading forklift trucks.

As a market leader in the small truck field, Mariotti offers you more than 20 different models with capacities of up to 3,000 lbs.

In 1920, Vasco Mariotti started designing and selling industrial trucks, carts, lift trucks, trailers, and packaging materials for the Italian market. He did this for over 50 years before selling to the now current owners of V. Mariotti S.r.l. As the years passed, production progressed to offer equipment such as pallet trucks, small-capacity counter-weighted lift trucks, counter-balanced forklifts, and electric conveyors.

However, in 1985 V. Mariotti found their niche with small capacity counter-balanced forklifts; and by 1992, a full line of forklifts with capacities from 800 lbs. to 3,000 lbs. was available.

As the market demands, new models with enhanced features continue to be introduced to the market.

**In 1998, Mariotti forklifts became available in North America and Mariotti USA came to fruition. Over the years, MariottiUSA has worked diligently to set up a comprehensive dealer network, suitable for servicing all new and used Mariotti products.**
