

PSxxTSL Series

Straddle leg Electric Pedestrian Stacker

with capacities of 1200/1600/1800kg

INTRODUCTION

- Safe, Compact and Ergonomic Long Tiller Design
- Precise Lifting and Lowering with Fully Proportional Hydraulic System
- Powerful, Maintenance Free German AC Power Train
- Core Components from Top Quality Brands
- 3 Wheel Structure for Stability

ADVANTAGES:

- The PSxxL series is tailored to most pedestrian controlled stacking operations with capacities from 2600 lbs to 4000lbs.
- Ergonomic tiller allows for efficient and safe operation.
- Proportional lifting allows for efficient and safe lifting of any product at any lift speed.
- By using high quality, state of the art components, this stacker will out perform and last longer than comparable stackers on the market today.

Straddle leg

Adjustable straddle leg design, suitable for diverse pallet sizes and more stability.

Easy Assembly

Multi position straddle allows for easy assembly, multiple pallet widths and excellent stability.

CAN-BUS

CANBUS technology

CANBUS technology allows for fewer wires and increased dependability.

CANBUS technology slows for easier adjustments and troubleshooting reducing downtime. New digital display outperforms analog.

ZAPI controller

ZAPI controller and Battery Indicator with hour meter as well as fault code display for easy maintenance.

For every application the right battery capacity

With the PSxxTSL series for every truck the right battery:

PS12TSL 24 volt 180 Ah battery;

PS16/18TSL 24 volt 270Ah battery standard.

Built in USB connector

USB connectot for charging of additional devices during warehouse operations.

Electronic proportional lifting and lowering

The eletronically controlled proportional lifting system ensures accurate positioning and stacking operations at every lifting height. Proportional lifting increases productivity especially at higher lift heights.

Long tiller design for ergonomics and safety

Through the long tiller design the operator can always keep a safe distance to the truck during proceeding the work very ergonomically.

The long liller allows the operator to keep a safe distance while providing precision operations.

Reduced force to the operator allows for easy and ergonomic control of the operation of the truck.

Handle operating heights are varied allowing for comfortable and efficient use of multiple operators.
